

93.6%

One of the most frequent questions we receive is, "Are your compressors made in America?" We applaud conscientious buyers who are committed to supporting their country, their neighbors, and are willing to 'go the extra mile' to help keep and promote American jobs. It's this kind of spirit that has helped Rolair flourish through three generations. So before we go any further, let us first say, thank you for your commitment. Beyond that, the short answer is that 93.6 percent of our compressors are assembled right here at our factory in Hustisford, Wisconsin. For the raw numbers, that's 132 of 141 models. Check out our full list below for specific model information. We realize this may lead to a few other questions, so here are some of our most Frequently Asked Questions:

Why do you use the term "Assembled in the USA" as opposed to "Made in the USA"?

While we agree that Made in America sounds better, we felt the most honest term to use was 'Assembled' because not all components on the compressors we build are from America (i.e. Honda engines). Rest assured that any Rolair compressor listed as 'Assembled in the USA' has many American-made components, and was built right here in Wisconsin by some of the hardest-working people you'll ever meet.

Which of your smaller hand carry compressors are assembled in Wisconsin?

The D2002HPV5 and the D2002HSSV5. These two units are still proudly assembled right here in Wisconsin, with our 'vertical pancake' tank design still being recognized as a Rolair innovation after 20+ years.

Is the foreign-made product limited to just the smaller hand carry compressors?

Yes. You will notice the limited foreign-made products we offer are only seen in this smaller category. This is because our competition continues to import directly to retailers and sell (often without checking for quality once it hits our shores), making it tougher to compete on pricing alone when you are comparing apples to oranges.

Are there any features that separate your foreign-made product from the competition?

Absolutely. While each unit has its own special features, and each compressor has been built precisely to our specs, perhaps the most important fact is that we don't simply import and sell without ever checking for quality once the product arrives at our docks. Unlike most of the compressors you see on the market, we will NEVER ship a Rolair direct to a store without EACH ONE coming to Wisconsin first. We take pride in continually testing ours and double-checking the quality. And our internal QC team here at the factory in Wisconsin is unrelenting in making sure the Rolair standard is never compromised. Not only does this help keep American jobs in our factory, it also prevents the out of box failures that are so common with imported goods.

In the end, offering useful information like this is a philosophy we must live by because we aren't like everybody else. Air compressors aren't just another product in a line of items we hope to sell. It's who we are, and it's all we do. We have to do it better than everybody else – and part of that includes educating. We hope you found this helpful, and we appreciate your willingness to buy American. Thank you.

The Rolair Team
Hustisford, WI USA
